

NorthStar Cautious Growth Portfolio Key Investor Information Document Pack

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product: Aegon Absolute Return Bond Fund, Sterling Class C, Cap
Aegon Asset Management Investment Company (Ireland) plc
ISIN: IE00B6SLQ646
Website: www.aegonam.com
Call number: + 353 1 622 4493

Central Bank of Ireland is responsible for supervising Aegon Asset Management Investment Company (Ireland) plc in relation to this Key Information Document.

Aegon Investment Management B.V. is authorised in the Netherlands and regulated by the Netherlands Authority for the Financial Markets

Date of Publication: 26/03/2026

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Aegon Absolute Return Bond Fund is a sub-fund of Aegon Asset Management Investment Company (Ireland) plc.

Term

The term of the Fund is unlimited and therefore there is no maturity date. The Fund Manager / Manufacturer may decide to terminate the Fund unilaterally as set out in the Prospectus of the Funds. Situations that give rise to an automatic termination are not foreseen in the Funds Prospectus, but may be foreseen by laws and regulations applicable to the Fund.

Objective: is to generate positive absolute returns for investors over a rolling 3 year period irrespective of market conditions.

Policy: invests worldwide in:

- Investment grade (lower risk) and high yield (higher risk) bonds issued by companies and governments;
- Derivatives (financial contracts whose value is linked to an underlying asset);
- Cash, deposits and money market instruments (a form of debt security); and
- Up to 20% in a combination of investments in emerging markets (those economies that are still developing) and high yield (higher risk) bonds.

The Fund is actively managed.

The Fund has discretion in its choice of investments and is not restricted by market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.

The Fund may use derivatives for investment purposes, to benefit from changes in the price of an underlying asset without actually owning it. The Fund may use investment techniques to manage risks and costs. These techniques include 'hedging' (using derivatives and other financial contracts to reduce the risk associated with: (i) making investments in other currencies; or (ii) interest rates changing). Up to 5% of the Fund may not be

'hedged' i.e. the Fund is exposed to the risks of investing in another currency for this portion.

The Fund may hold substantial amounts of cash to implement investment techniques or meet its objective.

Other information: You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Benchmark: The Investment Manager expects that the Fund will return performance in excess of SONIA 3 Month GBP plus 2 to 3% on an annualised basis over a rolling 3 year period, net of fees. Although the Fund expects to reach this level of performance, there is no guarantee that this will be achieved. The Fund's capital is at risk meaning that the Fund could suffer a decrease in value at any time. For currency hedged share classes, the Benchmark is shown in the share class currency.

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

Intended retail investor

The Fund is designed for retail and institutional investors seeking an absolute return through an actively managed portfolio which has the flexibility to access the complete range of fixed income securities. Investors in the Fund should be comfortable with a low level of investment risk. Share prices will fluctuate and may fall in value. It is important to understand that the Fund should be viewed as a medium to long term investment. The Fund may not be appropriate for investors who plan to invest in the short term.

The Depositary of the Fund is Citibank Depositary Services Ireland Limited.

Further information about the Fund and copies of the Prospectus, Supplement, latest Annual and Semi-Annual Reports of the Company can be obtained free of charge from our website (www.aegonam.com) or by calling +353 1 622 4493. These documents are available in English.

The prices of shares will be published daily on our website (www.aegonam.com).

What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower riskHigher risk

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 2 out of 7 which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact performance.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This fund exposes investors to investment risks, including market, credit and liquidity risk. Please refer to the fund's prospectus document for a comprehensive list of applicable risks for this fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		GBP 10 000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	GBP 9 270	GBP 9 380
	Average return each year	-7.30%	-2.11%
Unfavourable	What you might get back after costs	GBP 9 740	GBP 9 960
	Average return each year	-2.60%	-0.13%
Moderate	What you might get back after costs	GBP 10 150	GBP 10 480
	Average return each year	1.50%	1.58%
Favourable	What you might get back after costs	GBP 10 820	GBP 12 100
	Average return each year	8.20%	6.56%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 2017 and 2020.

Moderate scenario: this type of scenario occurred for an investment between 2019 and 2022.

Favourable scenario: this type of scenario occurred for an investment between 2022 and 2025.

What happens if Aegon Asset Management Investment Company (Ireland) plc is unable to pay out?

As a Fund participant, you may suffer financial loss in case the Fund is unable to pay out. This financial loss is not covered by the Irish Investor Compensation Scheme.

What are the costs?

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10 000 GBP is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 57	GBP 177
Annual cost impact (*)	0.6%	0.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.2% before costs and 1.6% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	GBP 0
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	GBP 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.40% of the value of your investment per year. This is an estimate based on actual costs over the last year.	GBP 40
Transaction costs	0.17% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell.	GBP 17
Incidental costs taken under specific conditions		
Performance fees (and carried interest)	There is no performance fee for this product.	GBP 0

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

Investors can subscribe and redeem daily. The Company may levy an initial charge of up to 5% of the Net Asset Value per Share in connection with the subscription of Class A, D, G, H, L and X Shares of the Fund. This fee will be retained for the benefit of the Global Distributor. There can also be a Repurchase Charge of up to 3% of the redemption amount on Classes A,D,G,H,L and X share classes. The Fund may suffer dilution (reduction in the value of the assets as a result of the costs incurred in dealing in its underlying investments and of any spread between the buying and the selling prices of such investments which is not reflected in the issue or redemption price paid by or to Shareholders). With a view to countering this (which, if it is significant, disadvantages existing or continuing Shareholders), the Manager may make an adjustment (Dilution Adjustment) to the Share price on a daily basis.

How can I complain?

Each shareholder/investor which is not satisfied with its experience as an investor in the Fund is entitled to bring a complaint in accordance with the applicable complaints handling policy. As an investor, you are entitled to file a complaint free of charge. Any such complaint must be handled by Aegon Investment Management B.V. or its delegates promptly and effectively. Aegon Asset Management's complaints management policy is available upon request. Irish investors may also have the right to complain to the Irish Financial Services and Pensions Ombudsman. Investors may also raise a complaint through the EU Online Dispute Resolution (ODR) portal www.ec.europa.eu/consumers/odr/ if the complaint relates to Shares that were subscribed by electronic means, including via email. Making a complaint will not prejudice your rights to commence legal proceedings. Our summary of investor rights and collective redress can be found on our website: <https://www.aegonam.com/en/contact/> under 'Complaints'.

NON-UCITS RETAIL SCHEME

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aviva Investors Multi-asset Core Fund II, Class 2, Accumulation shares, GBP, a sub-fund of the Aviva Investors Portfolio Funds ICVC (ISIN: GB00BMGWH130). The Fund is managed by Aviva Investors UK Fund Services Limited.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to grow your investment over the long term (5 years or more) through a combination of income and capital growth. The Fund targets an overall average return before charges and taxes of at least 0.30% greater than the performance benchmark per year, measured over 3-year rolling periods. The performance benchmark is a composite index, comprising 45% MSCI® All Countries World Index (Net) GBP and 55% Bloomberg Global Aggregate Bond Index Hedged GBP (the “**Performance Index**”). The Fund is managed to a “cautious” risk profile and aims to remain within a defined risk range of 41% to 49% of the volatility of “Global Equities”, targeting 45%. The benchmark we use to represent the volatility of “Global Equities” is MSCI® All Countries World Index (Net) GBP (the “**Volatility Index**”). Volatility is measured on an annualised basis, over 3-year rolling periods, using the volatility figures as at the end of each month.

Core Investment: The Fund will invest in a variety of global asset classes, namely shares of both developed and emerging market companies, bonds issued by companies, governments, or large institutional organisations in developed and emerging markets, cash and money market instruments. It will gain this exposure by investing directly in these assets, through the use of derivatives or investing in other funds (including funds managed by Aviva Investors companies). Derivatives may be used for investment purposes but will not materially alter the risk profile. They are also used to manage the Fund more efficiently and to reduce risk.

Other Investments: The Fund may also invest in property via real estate investment trusts, and indirectly in commodities, for example through another collective investment scheme, exchange traded commodity or a derivative.

Strategy: The Fund is actively managed and uses an asset allocation technique to blend asset classes for diversification aiming to provide returns consistent with the Fund’s “cautious” risk profile and return target. Based on a longer-term outlook, the Fund uses an asset allocation model which determines, within a range, the Fund’s allocation to the different asset classes. The asset mix of the Fund will be rebalanced on a periodic basis taking into account the results of the model, the “cautious” risk profile and market conditions. This means that the proportion of the portfolio allocated to each asset class is not fixed and may vary over time. For information on the current asset split, investors should refer to the latest Fund Fact Sheet. The Fund is part of a range of five multi asset core funds, each with their own risk profile, ranging from I (the lowest) to V (the highest). This Fund is number II in the range. For more information on these funds please refer to the prospectus.

This Fund is subject to Aviva Investors’ baseline exclusion policy – **please see Appendix 2 of the Prospectus for information on these limited investment restrictions.**

Performance & Risk Measurement: The Fund does not base its investment process on either the Performance Index or the Volatility Index, so will not hold every asset in them, and may also hold assets that do not form part of them. The Fund’s returns could therefore be very different from those of the Performance Index and the Volatility Index. Volatility measures how much the returns of the Fund may fluctuate and is an indicator of the level of risk taken by the Investment Manager. There may be times when the Fund operates outside of its defined risk range. The MSCI® All Country World Index (Net) GBP comprises large and medium-sized companies, as determined by their market capitalisation (total market value of a company’s outstanding shares), from both developed and emerging markets, and the index is designed to provide a broad measure of global equity market performance. The Bloomberg Global Aggregate Bond Index Hedged GBP is a measure of global investment grade debt from twenty-four local currency markets. The Performance Index and Volatility Index have been selected as an appropriate measure for the Funds performance and risk targets, because they are representative of the type of assets in which the Fund is likely to invest. For the purposes of calculating the 45%/55% weighting, the Performance Index is re-balanced as at the end of each month.

Note: MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Source: Bloomberg® and Bloomberg® Global Aggregate Bond Index Hedged GBP (the “Benchmark” or the “Index”) are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited (“BISL”), the administrator of the index (collectively, “Bloomberg”) and have been licensed for use for certain purposes by Aviva Investors UK Fund Services Limited. Bloomberg is not affiliated with Aviva Investors UK Fund Services Limited, and Bloomberg does not approve, endorse, review, or recommend the Aviva Investors Multi-asset Core Fund II. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to Aviva Investors Multi-asset Core Fund II.

Other information: You can buy and sell shares on any London business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This is an accumulation share class and any income from the Fund will remain in the Fund and is reflected in the share price.

For full investment objectives and policy details please refer to the Prospectus.

RISK AND REWARD PROFILE

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the higher of the historic volatility of its share price, the historic volatility of its current asset classes or its intended maximum risk levels.

Interest rate risk — bonds: When interest rates rise, bond values generally fall. This risk is generally greater for longer-term bonds and for bonds with higher credit quality.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

Currency risk: Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.

Default risk: Issuers of certain bonds or money market instruments could become unable to make payments on their bonds, causing a reduction in income to the Fund and also in the value of bonds held by the Fund. Under

extreme market or economic conditions, defaults could be widespread and their effect on Fund performance significant.

Derivatives risk: Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.

Emerging markets risk: Compared to developed markets, emerging markets can have greater political instability and limited investor rights and freedoms, and their securities can carry higher equity, market, liquidity, credit and currency risk.

Fixed Income Risk: Investments in fixed interest securities are impacted by market and credit risk and are sensitive to changes in interest rates and market expectations of future inflation. Bonds that produce a higher level of income usually have a greater risk of default.

Hedging risk: Any measures taken to offset specific risks will generate costs (which reduce performance), could work imperfectly or not at all, and if they do work will reduce opportunities for gain.

Equities Risk: Equities can lose value rapidly, can remain at low prices indefinitely, and generally involve higher risks — especially market risk — than bonds or money market instruments. Bankruptcy or other financial restructuring can cause the issuer's equities to lose most or all of their value.

Leverage risk: A small price decline on a "leveraged" underlying investment will create a correspondingly larger loss for the Fund. A high overall level of leverage and/or unusual market conditions could create significant losses for the Fund.

Target outcome risk: Any outcomes stated as targets are not guaranteed and may not be achieved.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

CHARGES

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

Charges taken from the Fund over a year

Ongoing charges	0.15%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds run by Aviva Investors UK Fund Services Limited) you might pay less – you can find the actual entry and exit charges from your financial adviser/distributor.

The ongoing charges figure is based on last year's expenses for the year ending 30 November 2025. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, including a full explanation of any performance fee (if applicable) please see the charges sections of the Fund's Prospectus.

PAST PERFORMANCE

Past performance is no guide to future performance. The past performance shown in the chart opposite takes into account all charges except entry charges.

The Share Class was launched on 30 November 2020. Performance is calculated in the Share Class currency which is GBP. Source: Aviva Investors/Morningstar as at 31 December 2025.

PRACTICAL INFORMATION

Depository - J.P. Morgan Europe Limited

More practical information about the Fund and copies of the Prospectus and the latest annual and half yearly reports are available free of charge from Aviva Investors UK Fund Services Limited PO Box 10410, Chelmsford, CM99 2AY. These documents will be in English and cover the whole ICVC.

The latest published price of shares in the Fund and other information on the Fund, including how to buy and sell shares, is also available at www.avivainvestors.co.uk.

Shares other than Class 2 are offered by the Fund, as set out in the Prospectus. You may switch between funds in the Aviva Investors Portfolio Funds ICVC. An entry charge may apply to a switch but it is normally waived on most funds other than the structured/defined return funds. Details on switching are provided in the Prospectus.

The Fund is subject to the tax laws and regulations of the United Kingdom. Depending on your own country of residence, this might have an impact on your investment.

The liabilities of the Fund are segregated and the assets of this Fund will not be used to pay debts of other funds.

Aviva Investors UK Fund Services Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

The details of the up-to-date remuneration policy of the Management Company, including the composition of its remuneration committee, a description of the key remuneration elements and an overview of how remuneration is determined, are available on the website www.avivainvestors.com. A paper copy of the remuneration policy can be made available upon request and free of charge at the Management Company's registered office.

The sub-fund launched on 30 November 2020, is authorised in the United Kingdom and regulated by The Financial Conduct Authority. Aviva Investors UK Fund Services Limited is authorised in the United Kingdom and regulated by The Financial Conduct Authority.

MyMap 4 Fund

A sub-fund of BlackRock Investment Funds

Class D Accumulating GBP

ISIN: GB00BFBFYJ57

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund is a fund in a series of MyMap funds and the number allocated to the Fund does not directly relate to the level of risk or return within the Fund and is used simply to differentiate the Fund from the other MyMap branded funds in the BlackRock Investment Funds umbrella.
- ▶ The aim of the Fund is to provide, over five year periods, a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) through an actively managed portfolio, whilst also maintaining a risk profile (i.e. an evaluation of the risks (e.g. risk of losses) associated with the portfolio) for the Fund's portfolio of 6%-9%.
- ▶ The risk profile of the Fund's portfolio, for this purpose, is measured as the volatility (i.e. the degree of fluctuation) of the Fund's returns converted into an annual rate, over a five year period. Generally, the higher the volatility, the riskier the investment.
- ▶ Although the Fund aims to achieve its investment objective, there is no guarantee that this will be achieved, and the Fund may experience loss. The Fund's risk profile may fall outside the stated range from time to time. There can be no guarantee that the Fund will maintain the target level of risk, especially during periods of unusually high or low volatility in the equity and fixed income markets. The Fund's potential gains and losses are likely to be constrained by the aim to stay within the predefined risk profile. The Fund's capital is at risk, meaning that the Fund could suffer a decrease in value and the value of your investment could decrease as a result.
- ▶ The Fund will seek to achieve its investment exposure by investing predominantly (more than 80% of the Fund's net asset value) in units of other funds, including, but not limited to exchange traded funds and other index funds managed by an affiliate of the BlackRock Group.
- ▶ At any one time, a substantial amount, or even all of the Fund's assets may be held in units of other funds.
- ▶ The Fund will seek to achieve its investment objective by obtaining indirect exposure to a variety of asset classes globally, including equity securities (e.g. shares), fixed income securities (such as corporate bonds and government bonds), cash and near cash instruments (such as money market instruments (i.e. debt securities with short term maturities)).
- ▶ The Fund will seek to stay within the stated risk profile by varying its asset allocations (i.e. mix of assets) in different market conditions. Given the lower risk profile of the Fund, under normal market conditions the Fund will seek a greater exposure to fixed income securities (which are generally considered to be less risky compared to equity securities), compared to a fund with a higher risk profile which would seek to have a greater exposure to equity securities (which are generally considered to be more risky compared to fixed income securities).
- ▶ The Fund may hold up to 15% of the Fund's net asset value indirectly in alternative asset classes (such as, but not limited to real estate and commodities (i.e. precious metals)).
- ▶ The Fund may also invest directly in financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) cash, near cash instruments, and forward transactions, for investment purposes and for the purposes of efficient portfolio management, including to hedge currency exposure to enable the Fund to profit from changes in currency exchange rates against the base currency of the Fund.
- ▶ The Fund is actively managed and the investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
 - ▶ The risk category shown is not guaranteed and may change over time.
 - ▶ The lowest category does not mean risk free.
 - ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.17%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2019. The unit class was launched in 2019.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at www.blackrock.com or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ The Fund is a sub-fund of BIF, an umbrella structure comprising different subfunds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the Fund's prospectus, annual and half-yearly reports are prepared for the BIF umbrella.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ Under UK law, BIF has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within BIF). In addition, the Fund's assets are held separately from the assets of other sub-funds.
- ▶ Investors may switch their units in the Fund for units in another sub-fund within BIF, subject to meeting certain conditions as set out in the prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CT UNIVERSAL MAP BALANCED FUND (THE "FUND")

Class C Accumulation Shares (GBP) GB00BF99W060, a sub-fund of Columbia Threadneedle (UK) ICVC III (the "Company"), regulated by the FCA.

This sub-fund is managed by Columbia Threadneedle Fund Management Limited, (part of the Columbia Threadneedle Investments group of companies).

Objectives and Investment Policy

- The Fund seeks to provide growth, combining capital and income, over the long term (at least 5 years) consistent with a balanced volatility level over the long term.
- The Fund will gain exposure to a range of global asset classes.
- At any point the Fund may be invested in any one or more of the following: collective investment schemes, equities (ordinary shares in companies), fixed income securities (securities that pay either a fixed or variable level of income on a periodic basis and generally repay a specified amount at a pre-determined date) including both government and non-government bonds, derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying assets), money-market instruments, deposits, cash and near cash, real estate investment trusts and other transferable securities. The Fund may use derivatives for investment purposes as well as for efficient portfolio management.
- The Fund is actively managed and the investment manager is not constrained by any particular asset allocation in respect of geography, industry or sector. The collective investment schemes in which the Fund invests may include other schemes promoted by Columbia Threadneedle Investments. Typically, the Fund will maintain, in normal market conditions, an exposure to equities of between 30% - 70% of the value of the portfolio, which in the investment manager's view, is consistent with the Fund's aim to maintain a balanced volatility level.
- The investment manager will aim to manage the Fund within a long term (at least 5 Years) volatility range.
- As the Fund is actively managed, the investment manager will determine the asset allocation exposures and ranges which are consistent with the target volatility range. At the investment manager's discretion, particularly in times of market stress, the Fund may not remain within the target volatility range over shorter time periods.
- Income from investments in the Fund will be added to the value of your shares.
- You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point. We are not required to hold monies arising from the purchase and sales of shares in our funds in a client money bank account and hold these monies in our own bank account, utilising the FCA's permitted one-day window while carrying out a delivery versus payment transaction for the purpose of settling transactions in relation to units in the Fund. In the exceptional event that a transaction is not processed within this one-day window, any cash will be held in a client bank account. No interest will be paid to investors on cash held on a client bank account.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator may not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:
 - Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.
 - Fixed Interest Securities Risk: changes in interest rates can affect the values of fixed interest holdings.
 - Credit Risk: receiving income or capital due from debt instruments is dependent on the provider's ability to pay.
 - Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
 - Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.
 - Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.
 - Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
 - Leverage Risk: the use of derivatives to increase the exposure of the Fund to the market through either long or short positions will make the value of the Fund's investments more volatile than those of an unleveraged fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	0.29%
------------------	-------

Charges taken from the fund under certain specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure shown here is an estimate of the charges because recent changes made to the Fund mean that the historic figures do not accurately reflect its ongoing costs. The UK-UCITS' annual report for each financial year will include detail on the exact charges made.

For more information about charges please see the Fund's prospectus.

Past Performance

Past performance is not a guide to future performance.

Fund launch date: 10/11/2017

Share/unit class launch date: 10/11/2017

Performance is calculated in GBP.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

This chart shows how much the Fund increased or decreased in value as a percentage each year.

Practical Information

- Depositary: State Street Trustees Limited.
- This document is issued by Columbia Threadneedle Fund Management Limited, a wholly owned subsidiary of Columbia Threadneedle Investments UK International Limited.
- You can obtain further information regarding the Fund, the Company, its Prospectus, latest annual reports and any half-yearly reports free of charge from the Management Company. The documents are available in English. You can obtain other practical information, including current share prices, at columbiathreadneedle.com.
- The Fund is part of Columbia Threadneedle (UK) ICVC III. You may switch investment between other funds or share classes of Columbia Threadneedle (UK) ICVC III. An entry charge may apply. Details on switching are provided in the Fund's prospectus.
- Details of the remuneration policy including a description of how remuneration and benefits are calculated and the persons responsible for awarding them (including the composition of the remuneration committee), are available at columbiathreadneedle.com. A paper copy is available free of charge upon request.
- The tax legislation of the United Kingdom may have an impact on your personal tax position.
- Columbia Threadneedle Fund Management Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the UK-UCITS.
- This document describes a single fund of the Company. The Prospectus and reports are prepared for the entire Company.
- The assets of the Fund are segregated by law and cannot be used to pay the liabilities of other funds of the Company.

Non UCITs Retail Scheme Key Investor Information

FIDELITY MULTI ASSET ALLOCATOR GROWTH FUND

a sub-fund of FIDELITY INVESTMENT FUNDS IV

FIDELITY MULTI ASSET ALLOCATOR GROWTH FUND W-ACCUMULATION

(ISIN: GB00B9C3GS90)

This fund is managed by FIL INVESTMENT SERVICES (UK) LIMITED

Objectives and investment policy

Objective: The fund aims to increase the value of your investment over a period of 5 years or more through global exposure to both lower and higher risk assets.

Investment Policy: The fund will invest at least 70% into funds that use an 'index tracking' (also known as 'passive') investment management approach (these may include funds managed by Fidelity), with the aim of pursuing a lower cost investment approach. The remainder will be invested in other investment types such as cash and derivatives. The fund aims to maintain a fixed allocation to 60% higher risk assets (such as shares in global, smaller and emerging market companies) and 40% lower risk assets (such as global, government and corporate bonds and cash), but this range may change with market conditions, and will be periodically rebalanced back to its target 60/40 allocation. As part of the fund's asset allocation process, the Investment Manager will aim to maintain an underlying static asset allocation that is designed in-house and based on proprietary capital market assumptions using quantitative research. For the 40% lower-risk assets, the fund will aim to maintain an allocation of at least 20% in government bonds and over 10% in corporate bonds. For the 60% higher-risk assets, the fund will aim to maintain an allocation of at least 35% in global equities with the remainder spread across assets including global real estate investment trusts, global small cap and emerging market equities. The Investment Manager rebalances the strategy regularly back to these static asset allocations and has discretion over when to do so. However, the Investment Manager does not take relative positions 'overweight' or 'underweight' versus this static mix. The fund does not aim to outperform this static asset allocation.

Investment Process: The fund is managed without reference to a benchmark and has full discretion in its choices of investments within its objectives and policies.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment. The fund may also use derivatives with the aim of achieving the investment objective.

Base Currency GBP

Distribution: As this is a non-distributing share class, dividends are re-invested.

Additional Information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund.

Risk and reward profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average. The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.

Charges for the fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing Charge	0.20%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 31/10/2025. This figure may vary from year to year. It excludes: • performance fees (where applicable); • portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on Oct. 10, 2011. This share class was launched on March 1, 2013.

Past performance has been calculated in GBP

Practical Information

Depository: JP Morgan Europe Limited.

This key information document describes a sub-fund of Fidelity Investment Funds IV (the "Fund"). The prospectus and periodic reports are prepared for the entire Fund.

For more information, please consult the prospectus and latest reports and accounts which may be obtained free of charge in English from FIL Investment Services (UK) Limited. These documents and details of the remuneration policy are available via www.fidelityinternational.com.

FIL Investment Services (UK) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus of the fund.

The Net Asset Value of the fund is available at the registered office of FIL Investment Services (UK) Limited, and at www.fidelityinternational.com.

The assets and liabilities of the fund are segregated by law from those of other sub-funds and there is no cross-liability among the sub-funds.

You may have the right to switch from this share class into the same or possibly other share class types of another sub-fund of the Fund. Details on switching rules may be found in the Prospectus. The tax legislation in United Kingdom may have an impact on your personal tax position. For further details you should consult a tax advisor.

This fund is authorised in United Kingdom and regulated by Financial Conduct Authority (FCA). FIL Investment Services (UK) Limited is authorised in United Kingdom and regulated by Financial Conduct Authority (FCA).

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FTSE All-World Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Asset Management (Fund Services UK) Limited

Class: Accumulation C
ISIN: GB00BMJJJF91

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to track the performance of the FTSE All-World Index (the "Index") before the deduction of charges and tax.
- The Index measures the performance of large and medium sized companies in developed and **emerging markets**.
- The Fund will invest in a representative sample of the shares (**equities**) of companies that make up the Index and possibly some securities that are not included in the Index that are designed to help the Fund track the performance of the Index.
- The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.20%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.13%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2025. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the FTSE All-World Index.
- The Fund was launched on 25 July 2014.

Practical Information

Depository

State Street Trustees Limited.

Further information

Further information about the OEIC including the latest Prospectus, latest published prices of shares, annual report and half yearly report and, where applicable, the SDR Consumer Facing Disclosure may be obtained free of charge, in English, from the Administrator, HSBC Asset Management (Fund Services UK) Limited, Sunderland SR43 4BF or by visiting www.assetmanagement.hsbc.com. The most recent Prospectus is available in English. This document describes a single share class of the OEIC. The Prospectus, annual and half yearly reports are prepared for the entire OEIC.

Share classes

Other share classes are available, as detailed in the Prospectus. It is possible to convert your shares into a different share class or switch your shares into a different Fund within the OEIC. Details of how to do this are in the Prospectus (please note an initial charge may apply).

Remuneration Policy

The Remuneration Policy of the Authorised Corporate Director, which describes the remuneration practices and governance arrangements for UCITS and AIFMD Authorised entities, is available at www.assetmanagement.hsbc.com (please select "About Us" then "Our Governance" then "Remuneration Practices and Governance Arrangements for UCITS and AIFMD Authorised Entities") or on request free of charge from the Administrator.

Tax

UK tax legislation may have an impact on your personal position.

Management Company

HSBC Asset Management (Fund Services UK) Limited, the Authorised Corporate Director, may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the OEIC.

Segregated liability

The OEIC is an umbrella investment company with segregated liability between Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Asset Management (Fund Services UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority.

This key investor information is accurate as at 17 February 2026.

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Strategy Balanced Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Asset Management (Fund Services UK) Limited

Class: Accumulation C
ISIN: GB00B76WP695

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on the HSBC Global Asset Management (UK) Limited website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** in line with its risk profile in the long term, which is a period of 5 years or more.
- This is one of a range of **actively managed** Global Strategy Portfolios offered at five different risk levels. The Fund is rated as 3, where 1 is a lower level of risk and 5 is a higher level of risk.
- The level of risk stated is to allow investors to compare the risk relative to other Global Strategy Portfolios. This differs from the Risk and reward profile below, which we are required to provide by regulation and which allows investors to compare the risk for different types of funds.
- As the Fund is managed with the aim of maximising **returns** in line with its long term risk profile any potential **returns** are likely to be limited by the risk profile of the Fund.
- To achieve its objective the Fund will invest a minimum of 70% in other funds, including funds which aim to track the performance of **market indices**. The other funds will in turn invest in a range of asset types such as shares of companies (**equities**), **bonds** and property that make up the index. The Fund will be invested across global markets.
- The other funds that the Fund invests in will, where possible, be those managed by the **HSBC Group**. Where this isn't possible the Fund may invest in funds managed by other fund providers.
- The Fund may invest up to 30% of its value directly in asset types such as **bonds** where the investment objective can be more efficiently achieved, as well as cash.
- The Fund aims to meet its objective with a focus on lower ongoing charges. This is taken into consideration when deciding which asset classes the Fund will invest in and how the Fund achieves exposure to those asset classes.

- The **asset allocation** of each fund in the range reflects the risk level. Under typical market conditions, the **asset allocation** of the Fund will be as follows: **Equities**: 45-70%, **Bonds**: 20-55%, Other asset types, including cash: 0-25%. These percentages will fluctuate based upon market movement and adjustments to the **asset allocation** to enable the Fund to meet its aim.

Use of Benchmarks

- The Fund is actively managed in line with its risk profile instead of being managed with reference to a benchmark. The performance of the Fund is compared against the performance of funds that are part of the Morningstar Allocation 40-60% Equity Category, with both **returns** and **volatility** considered in the comparison.

Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**, and for broader investment purposes to help the Fund meet its objective. In particular **derivatives** will be used to reduce or increase the Fund's exposure to different types of assets and to reduce the risk associated with movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The Fund does not intend to use **derivatives** extensively and their use will be consistent with the risk profile of the Fund.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.18%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
 - A conversion charge may be payable.
 - The ongoing charges figure is based on last year's expenses for the year ending 15/10/2025. Charges may vary from year to year.
- Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The Fund was launched on 17 October 2011.

Practical Information

Depository
State Street Trustees Limited.

Further information
Further information about the OEIC including the latest Prospectus, latest published prices of shares, annual report and half yearly report and, where applicable, the SDR Consumer Facing Disclosure may be obtained free of charge, in English, from the Administrator, HSBC Asset Management (Fund Services UK) Limited, Sunderland SR43 4BF or by visiting www.assetmanagement.hsbc.com. The most recent Prospectus is available in English. This document describes a single share class of the OEIC. The Prospectus, annual and half yearly reports are prepared for the entire OEIC.

Share classes
Other share classes are available, as detailed in the Prospectus. It is possible to convert your shares into a different share class or switch your shares into a different Fund within the OEIC. Details of how to do this are in the Prospectus (please note an initial charge may apply).

Remuneration Policy
The Remuneration Policy of the Authorised Corporate Director, which describes the remuneration practices and governance arrangements for UCITS and AIFMD Authorised entities, is available at www.assetmanagement.hsbc.com (please select "About Us" then "Our Governance" then "Remuneration Practices and Governance Arrangements for UCITS and AIFMD Authorised Entities") or on request free of charge from the Administrator.

Tax
UK tax legislation may have an impact on your personal position.

Segregated liability
The OEIC is an umbrella investment company with segregated liability between Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General Global Infrastructure Index Fund Unit Class I GBP Accumulation – ISIN: GB00BF0TZG22

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE Global Core Infrastructure Index (the "Benchmark Index") on a net total return basis before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Benchmark Index is comprised of shares in companies with infrastructure core activities in accordance with the index provider's methodology.
- The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
- The Fund will have at least 90% exposure (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) to assets that are included in the Benchmark Index.
- The Fund may also invest in money market instruments (such as treasury bills), depositary receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Fund may use derivatives (contracts which have a value linked to the

price of another asset) to: reduce risk or cost; or generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- This Fund may be suitable for investors looking to invest in shares in companies with infrastructure as its core activity as represented by the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within 5 years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
- Units of the Fund can be bought or sold on any dealing day, as defined in the Prospectus. The non-dealing day calendar is available at www.lgim.com/utnndd.
- The Fund's base currency is denominated in sterling (GBP).

RISK AND REWARD PROFILE

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com. The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund may invest in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: (i) may not be as well regulated; (ii) may be more difficult to buy and sell; (iii) may have less reliable arrangements for the safekeeping of investments; or (iv) may be more exposed to political and taxation uncertainties. The value of the Fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short-term.
- Most of the Fund holds investments from a particular market sector. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the Fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short-term.
- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested.

The price for buying and selling units is subject to a Dilution Adjustment See opposite.

Charges taken from the fund over a year

Ongoing charge	0.30%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at 28 February 2026. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

Other costs:

- **Dilution adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2018.
- This unit class launched in 2018.

PRACTICAL INFORMATION

- The trustee and depositary is Northern Trust Investor Services Limited.
- You can obtain further information about the Fund including copies of its Prospectus and the latest annual and semi-annual reports at www.legalandgeneral.com/reports. Paper copies of these documents are also available free of charge in English from Legal & General Investments, PO Box 6080, Wolverhampton WV1 9RB.
- Investors can get other practical information, including the latest prices, dilution adjustment and details of any other unit classes that are available, by calling us on 0370 050 0955 Monday to Friday between 9:00a.m. to 5:00p.m. Call charges will vary.
- This Fund is subject to the tax legislation of the United Kingdom, which may have an impact on each investor's personal tax position.
- Legal & General (Unit Trust Managers) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.
- Details of our Remuneration Policy including our Remuneration Committee and how remuneration and benefits are calculated can be accessed from www.lgim.com/remuneration. A paper copy is also available free of charge upon request.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Short-Term Money Market Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B8XYYQ86
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund aims to preserve capital and generate income, over rolling 12-months periods, before the deduction of fees.

Policy At least 80% of the Fund is invested in eligible assets as permitted by the UK Money Market Funds Regulation. This includes fixed-term deposits, certificates of deposit, commercial paper, floating-rate notes, short-dated government bonds, reverse repurchase agreements and cash.

All assets held by the Fund (excluding cash and reverse purchase agreements) will have 397 days or less to maturity and a minimum rating of A-1, P-1 or F1 or long-term equivalent. The weighted average maturity of the Fund will not exceed 60 days and the weighted average life will not exceed 120 days.

The Fund may use derivatives for the purpose of Efficient Portfolio Management. The use of derivatives for this purpose is unlikely to increase the risk profile of the Fund.

Strategy The Fund is actively managed, meaning the Investment Manager uses its expertise to select investments to meet the objective.

The Investment Manager selects assets for the Fund by applying predefined ethical criteria (set out below) which is reviewed on a quarterly basis.

The Fund does not invest in bonds or other securities issued by companies or other organisations that generate more than 10% of their turnover from either one or more of the following:

- 1) Armaments – the manufacture of armaments, nuclear weapons or associated strategic products;
- 2) Tobacco – the growing, processing or selling of tobacco products; and
- 3) Fossil fuels - the exploration, extraction and refining of oil, gas or coal.

Benchmark A performance comparator for the Fund is the Bank of England Sterling Overnight Interbank Average (“SONIA”).

SONIA is the average overnight interest rate UK banks pay for unsecured transactions in sterling that is a widely recognised approach to benchmarking short-term money market and fixed income funds and therefore is considered an appropriate performance comparator.

Another performance comparator for the Fund is the IA Short Term Money Market sector (the “IA Sector”).

Recommendation Investors who seek current income, protection of capital (but not guaranteed) or a short-term investment option, less than 12 months.

Concepts to understand

Money market instruments Money-market instruments are short-term, liquid investments issued by public institutions or companies.

Rolling 12 month Period A rolling 12 month period is any period of twelve months, no matter which day you start on.

Reverse repurchase agreements Agreeing to sell a purchased security at a specified later date.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Ratings Credit-rating agencies rate bonds based on the likelihood of them defaulting and being unable to repay their debt.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 1 because its share price has shown a very low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, money market instruments are typically less volatile than bonds and shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Inflation Risk Where the income yield is lower than the rate of inflation, the real value of your investment will reduce over time.

Money Market Fund Risks A Money Market Fund is not a guaranteed investment, and is different from an investment in deposits. The principal invested in the Fund is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.10%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay. The Fund was launched on 22 July 1999 as a unit trust and converted to an open-ended investment company (OEIC) on 30 April 2010. The share class was launched on 26 November 2012.

Past performance is not a guarantee or reliable indicator of future returns. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Practical information

Depository: HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund’s Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below. Alternatively, visit www.rlam.com. The Prospectus and shareholder reports are in English. This document describes one share class of the Fund. The Prospectus and annual and semi-annual shareholder reports are prepared for the entire fund across all share classes. For fund performance and most recent share price, visit www.rlam.com. Should you wish to switch share classes or funds, please see the “Switching” section of the Prospectus for details. This Sub-Fund qualifies as a “Variable Net Asset Value Money Market Fund” in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on Money Market Funds as may be amended or replaced from time to time and therefore will comply with these guidelines.

Tax: Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of their investment in the Fund. Contact your adviser to discuss tax treatment, suitability of this investment, and other questions.

Notices: Royal London Unit Trust Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus. Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Vanguard LifeStrategy 60% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy Funds ICVC

A GBP Accumulation Shares

ISIN: GB00B3TYHH97

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to provide a return on your investment (through an increase in the value of, and income received from, assets held by the Fund) within a pre-defined asset allocation over the long-term (5 years or more).
- The Fund is actively managed and seeks to achieve its investment objective by investing at least 90% of its assets by value in a diversified portfolio of passive funds that seek to track the performance of an index, and which are managed or operated by the ACD or other companies in the Vanguard Group of Companies ("Associated Schemes").
- The pre-defined asset allocation for the Fund means that it is intended that the Fund will invest: (1) approximately 60% of its assets by value in Associated Schemes which provide exposure to shares of companies worldwide. Approximately 20% of such investments (by value) will be in UK listed companies; and (2) approximately 40% of its assets by value in Associated Schemes which provide exposure to government and corporate bonds and other similar fixed income investments worldwide. Approximately 20% of such investments (by value) will be in Sterling-denominated investments (including UK government bonds (gilts), government related bonds, index-linked gilts and investment-grade bonds), which may include Sterling-denominated bonds issued by companies outside the UK.
- This Fund is part of a range of funds. Within this range, a fund which invests more in Associated Schemes that provide exposure to shares of companies will typically be riskier than a fund which invests more in Associated Schemes that provide exposure to government and corporate bonds and other similar fixed income investments.
- The Fund may also invest up to 10% of its assets directly in transferable securities (such as shares, bonds and other similar fixed income investments, which will generally be components of the indices tracked by the Associated Schemes), money market instruments and deposits.
- In addition to the pre-defined asset allocation, the Investment Adviser will aim to maintain a strategic asset allocation that is designed using research

conducted by Vanguard. The Fund does not aim to outperform this strategic asset allocation.

- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-LifeStrategy-Funds-ICVC.pdf>

For further information about the objectives and investment policy of the Fund, please see Appendix 1 of the Vanguard LifeStrategy Funds ICVC Prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors and Performance" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2025. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled “Buying Shares”, “Redeeming Shares”, “Charges and Expenses”, “Dilution Adjustment” and Appendix 1 of the Prospectus on our website at <https://global.vanguard.com>

Past performance

- **Past performance:**
- **Is not a reliable indication of future performance.**
- Includes ongoing charges and the reinvestment of income. It excludes entry and exit fees.
- Has been calculated in GBP.
- Shares in the Fund were first issued in 2011.
- This share class was launched in 2014.
- Performance was achieved under circumstances that no longer apply. The Fund has changed to a non-UCITS retail scheme (NURS) with effect from 07 January 2026. Past performance data for each year prior to 2025 shown in the past performance chart therefore relates to performance of the Fund when an UK UCITS fund structure.

Practical information

- **Depositary:** State Street Trustees Limited.
- **Documents, prices of shares and further information:** You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for Vanguard LifeStrategy Funds ICVC (“VLF”) along with the latest published prices of shares and other practical information, from our website at <https://global.vanguard.com>. The documents are available in English and are free of charge.
- **Prices:** The last published prices of shares in the Fund are also available from the FT’s website www.ft.com or <https://global.vanguard.com>.
- **Tax:** VLF is subject to the tax laws of the United Kingdom. Depending on your country of residence, this may have an impact on your personal tax position. You are recommended to consult your professional tax adviser.
- **Liability:** VIUK may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for VLF.
- **Sub-funds:** This document describes a sub-fund of VLF. The prospectus and periodic reports are prepared for the entire company.
- The Fund’s assets belong exclusively to the Fund and shall not be used to discharge the liabilities of or claims against VLF, other sub-funds of VLF or any other person or body.
- **Shares:** The Fund is part of VLF and has both accumulation and income shares. You may switch some or all of your shares of one type, to shares of another type within the same Fund, or between other sub-funds of VLF or other funds managed by VIUK. Details of switching are provided in the Prospectus.
- Information about other share classes offered by VLF can be found in the prospectus or from our website at <https://global.vanguard.com>.
- **Remuneration policy:** Details of the Vanguard European Remuneration Policy are available at <https://fund-docs.vanguard.com/remuneration-policy.pdf> including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, on request from the Head of Human Resources, Europe, Vanguard Asset Services, Limited, 4th Floor The Walbrook Building, 25 Walbrook, London EC4N 8AF.
